PERSONAL PROJECTS

•Full-Stack Messaging Platform

Feb 2026

Personal Project

- Tools & Technologies: React.js (Vite), Node.js, Express.js, MongoDB, Socket.io, Zustand, Tailwind CSS, Arcjet, Cloudinary
- Developed a highly responsive full-stack messaging application featuring private messaging and live user presence indicators using Socket.io and Zustand.
- Engineered a secure backend architecture with custom JWT authentication, bcryptjs password hashing, and Arcjet API rate-limiting.
- Integrated third-party cloud services, including Cloudinary for seamless media uploads and Resend for automated transactional emails.

•Expense Splitter Web Application

Mar 2026

Built as part of personal learning

- Tools & Technologies: React.js, Node.js, Express.js, MongoDB, Redux Toolkit, Tailwind CSS, REST APIs
- Developed a full-stack application for managing shared expenses, utilizing React.js and Redux Toolkit for efficient global state management and Tailwind CSS for a responsive UI.
- Built the backend logic using MongoDB aggregations (\$facet, \$group) to instantly calculate and update group balances.
- Implemented a custom Greedy Debt-Settlement Algorithm to minimize the total number of transactions required to clear debts among group members.

TECHNICAL SKILLS AND INTERESTS
